REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: The Examiner finds Applicant's arguments on pages 2-3 of the "Response to Rule 1.105" Requirement" filed 27 April 2004 and on page 7 of the "Amendment" and filed 13 October 2004, concerning method for sizing the hardware resources for a yet-to-be built database management system persuasive as applied to independent claim 1. The combinations of prior art from Stellwagen, Jr. (U.S. Patent No. 5,835,755) and Robinson et al. (U.S. Patent No. 6,263,433) do not render obvious nor anticipate the combination of recited elements in light of claim 1 as amended by the "Amendment" filed on 13 October 2004. The "Response to Rule 1.105 Requirement" meets all criteria that show the invention claimed in claim 1 was invented by the applicant prior to the filing date of the Yang et al. (U.S. Patent No. 6,542,854) patent on 30 April 1999, which was used to tender obvious independent claim 1 in previous office actions. No adequate prior art with an earlier filing date has been found to replace the Yang patent. The affidavit relates the invention to a file containing an E-mail message of an updated version of the NT sizer program, which was completed and distributed to a number of recipients prior to 30 April 1999. The distribution to number of recipients meets the corroboration requirement "in order to establish an actual reduction to practice, an inventor's testimony must be corroborated by independent evidence" per Cooper v. Goldfarb, 154 F.3d 1321, 1330, 47 USPDQ2d 1896, 1903 (Fed. Cir. 1998). The NT Sizer User Guide was not published prior to 28 February 1999, which is one year prior to the filing date of

Art Unit: 2167

the patent application. The affidavit maps the elements in the independent claims to the corresponding elements in the disclosure of the NT Sizer User Guide.

2. The Examiner finds Applicant's arguments on pages 2-3 of the "Response to Rule 1.105 Requirement" filed 27 April 2004 and on page 7 of the "Amendment" and filed 13 October 2004, concerning a computerized method for calculating hardware resource requirements for a yet-to-be built database management system computer persuasive as applied to independent claim 16. The combinations of prior art from Stellwagen, Jr. (U.S. Patent No. 5,835,755), Robinson et al. (U.S. Patent No. 6,263,433), and Fanshier (U.S. Patent No. 5,841,972) do not render obvious nor anticipate the combination of recited elements in light of claim 16 as amended by the "Amendment" filed on 13 October 2004. The "Response to Rule 1.105 Requirement" meets all criteria that show the invention claimed in claim 16 was invented by the applicant prior to the filing date of the Yang et al. (U.S. Patent No. 6,542,854) patent on 30 April 1999, which was used to tender obvious independent claim 16 in previous office actions. No adequate prior art with an earlier filing date has been found to replace the Yang patent. The affidavit relates the invention to a file containing an E-mail message of an updated version of the NT sizer program, which was completed and distributed to a number of recipients prior to 30 April 1999. The distribution to number of recipients meets the corroboration requirement "in order to establish an actual reduction to practice, an inventor's testimony must be corroborated by independent evidence" per Cooper v. Goldfarb, 154 F.3d 1321, 1330, 47 USPDQ2d 1896, 1903 (Fed. Cir. 1998). The NT Sizer User Guide was not published prior to 28 February 1999, which is one

year prior to the filing date of the patent application. The affidavit maps the elements in the independent claims to the corresponding elements in the disclosure of the NT Sizer User Guide.

CONCLUSION

- 3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
- 4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Harold E. Dodds, Jr. whose telephone number is (571)-272-4110. The examiner can normally be reached on Monday Friday 8:00 4:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, John E. Breene can be reached on (571)-272-4107. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
